

No smoking policy at GCT Deltaport

Due to health concerns arising from exposure to tobacco and related products, in order to provide a smoke-free environment for anyone working on or interacting with the terminal, please be advised that GCT Canada has instituted a no smoking policy at GCT Deltaport.

GCT Canada's policy requires that all employees, workforce, the drayage community, visitors, and contractors refrain from smoking within GCT Deltaport's perimeter fence, including but not limited to, the inside of all vehicles and container handling equipment. Smoking is prohibited in all areas inside the site perimeter (gate-to-gate). Smoking is permitted outside of the terminal's site perimeter. This policy extends to the use of tobacco and all tobacco related items, including vaping products and chewing tobacco.

If you should have any questions regarding our policy, please do not hesitate to contact us at customerservice-can@globalterminals.com.

Sincerely,

GCT Canada Safety & Security Team
